GEP project Points to improve.

The improvements below are a reflection on the implementation of our GEP project in the 4th ESO Music classes. Please be aware that, due to the Covid pandemic restrictions affecting schools, this group is actually not having any Science subjects (optatives)

Note that soon after our implementation of the project started, we realized that it was too difficult and time consuming for our students to do the whole podcast in English. Therefore, they were allowed to do the body of their podcasts in another language and only asked to do the introduction and conclusions in English.

Let's start

- Questions and explanations are too wordy: Summarize
- Reduce the list of *Radio Genres:*
- Activity 3a: Use *Underline instead* of *Explain*
- Activity 3b *Planning our podcast*:
    - The videos are too long. Find a shorter video
    - Move this activity to session 5

Doing Science

- Activity 1 : *What is and what is not Science* ? All students together instead of small groups.
- Activity 4: Instead of Reading the whole text in pairs, each pair reads a paragraph first ant then explains/ reports what they read to other groups.
- Activity 5: Statements should be added

Writing Science

- Organize better this section: summarizing (number 5) should be placed before What is your goal
- Planning our podcast
    - Presently in the section *Writing Science*, should include a section with the activities in "Let's start" and "writing Science"

Searching for your podcast sound

- Activity 1. C*olumns and concepts:* There should only be 3 concepts and 3 sentences. Delete or merge some of the sentences there
- - *Where can we add music?*: Follow the pattern in exercise 1 in this section

Designing your podcast sound

- Exercise 5: Delete horizontal lines
- delete activity 6
